

# Keevil CofE Academy Science Curriculum Overview

<p><b>EYFS/KS1</b> <b>Year 1</b></p>	<p><b>Humans</b></p> <ul style="list-style-type: none"> <li>Explore the natural world around them, making observations and drawing pictures of animals and plants.</li> <li>find out about and describe the basic needs of animals, including humans, for survival (water, food and air)</li> <li>describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.</li> <li>identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</li> </ul>	<p><b>Seasonal Change</b></p> <ul style="list-style-type: none"> <li>Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.</li> <li>observe changes across the four seasons</li> <li>observe and describe weather associated with the seasons and how day length varies.</li> </ul>	<p><b>Everyday Materials</b></p> <ul style="list-style-type: none"> <li>Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.</li> <li>distinguish between an object and the material from which it is made</li> <li>identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock</li> <li>describe the simple physical properties of a variety of everyday materials</li> <li>compare and group together a variety of everyday materials on the basis of their simple physical properties.</li> </ul>	<p><b>Forces</b></p> <ul style="list-style-type: none"> <li>Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.</li> <li>observe, describe and compare movements they make and movements of objects in terms of speed or direction</li> <li>describe how to make a familiar object start moving by pushing or pulling</li> <li>recognise dangers to themselves in moving objects</li> <li>describe how to use pushes and pulls to make familiar objects speed up, slow down, or change direction or shape</li> <li>recognise that pushes and pulls are forces</li> <li>plan a comparison and decide whether it was fair</li> <li>make measurements of length using standard units and present these in a chart</li> </ul>	<p><b>Plant Diversity</b></p> <ul style="list-style-type: none"> <li>Explore the natural world around them, making observations and drawing pictures of animals and plants.</li> <li>Know some similarities and difference between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.</li> <li>identify and name a variety of common wild and garden plants, including deciduous and evergreen trees</li> <li>identify and describe the basic structure of a variety of common flowering plants, including trees.</li> </ul>	<p><b>Electricity</b></p> <ul style="list-style-type: none"> <li>Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.</li> <li>identify common appliances which use electricity</li> <li>describe the dangers associated with mains electricity</li> <li>construct and make drawings of simple working circuits and explain why some circuits work and others do not</li> </ul>
<p><b>Keevil Characteristics</b></p>	<p>Problem Solving: finding new ways to answer questions, developing different approaches when problems arise. Teamwork: taking account of others when approaching a task.</p>	<p>Problem Solving: finding new ways to answer questions, developing different approaches when problems arise. **Upper KS2  
Year 1**

**Earth and Space**

- describe the movement of the Earth, and other planets, relative to the Sun in the solar system
- describe the movement of the Moon relative to the Earth
- describe the Sun, Earth and Moon as approximately spherical bodies
- use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

**Light**

- recognise that light appears to travel in straight lines
- use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
- explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
- use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

**Evolution and Inheritance**

- recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago
- recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents
- identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.

**Living things and their habitats  
Inc. classification, life processes, reproduction and adaptation**

- describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird
- describe the life process of reproduction in some plants and animals.
- describe the changes as humans develop to old age.
- describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals
- give reasons for classifying plants and animals based on specific characteristics.

**Keevil  
Characteristics**

Diligence in presentation  
Team work and good communication are vital during whole class discussions, this shares knowledge and improves learning

Diligence in presentation  
Team work and good communication are vital during whole class discussions, this shares knowledge and improves learning
